

SECURED MULTI-POINT CONNECTIVITY FOR BUSINESSES ACROSS GEOGRAPHIES

MPLS VPN

• Standard VPN • Managed VPN

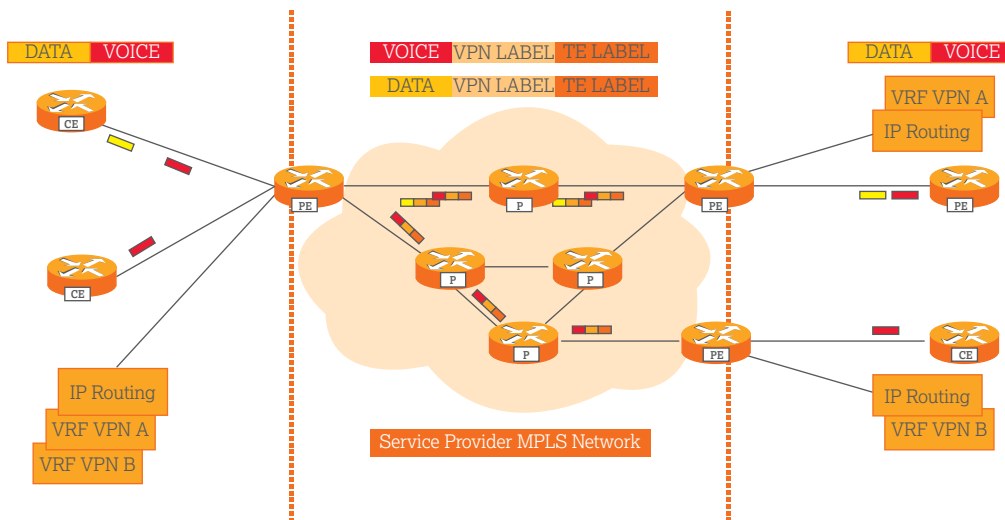

Businesses require secure internal communication including audio, video and multiple file-type transfer via virtual private network accessible only to authorised personnel. Multi-Protocol Label Switching (MPLS) technology, enables your business to function seamlessly across geographies. It is a secure and scalable way of connecting customer locations on a private cloud.

ANYTIME, ANYWHERE CONNECTIVITY

Our MPLS (Multi-Protocol Label Switching) based Virtual Private Network (VPN) delivers PAN India connectivity across 100+ points of strategic presence. We help you optimise your business with a fully meshed network to ensure fail-safe connectivity. With our mobile and managed solutions, authorised personnel may connect to business networks from anywhere including remote locations.

MPLS VPN Network

BUSINESS ADVANTAGES

- Optimise workflow as our solution seamlessly integrates with your office VPN
- Provide business partners / customers restricted access thereby enhancing security
- Stay connected on a reliable network with end to end Service Level Agreement
- Stay on top of your game with real-time performance reporting and proactive monitoring
- Get enhanced security through VPN-only solution with protected internet access for sensitive information
- Get secure internet access on the move with mobile VPN solution on GSM and CDMA

Our standard MPLS VPN is a secure connectivity solution that can be deployed on any last mile. If latency is of concern, then nothing beats our wired MPLS solution. Whereas, if you are looking for a quick deployment at new or remote locations, then our wireless MPLS deployment is ideal. In all our deployments you will have Assured Quality of Service for a stress free, reliable solution. With our standard MPLS VPN your authorized personnel can access your enterprise applications including mails, intranet services, ERP, CRM, collaborate on video conference, tele-presence, remote trainings or even indulge in real time voice over IP (CUG). What's more, on our standard MPLS VPN, you can even prioritize network resource allocation for priority applications.

Managed VPN provides an all inclusive VPN service. This includes customer premise equipment, maintenance, last mile equipment, network bandwidth, performance reports and 24x7 proactive management/ monitoring. Managed VPN relieves you from all network management burdens and is duly supported with service level guarantees. You can also build additional security layer over Managed VPN with our Unified Threat Management offering.

STANDARD AND MANAGED MPLS VPN

VARIANT COMPARISON

Features	Standard	Managed
Service Features		
Layer 2 VPLS	✓	
Layer 3	✓	✓
Multicast support	✓	✓
